RHDG to work with UC Berkeley

February 2008

The University of California at Berkeley has awarded Riezebos Holzbaur Design Group (RHDG) with a five-year contract to create and produce their Breakthroughs magazine.

Breakthroughs is the official news magazine from the College of Natural Resources. Each issue chronicles current events and new developments emerging from the College.

The University of California tapped RHDG to rebrand the Breakthroughs cover and interior layout. The agency will also provide editorial and production services.
